<VS2> in the original 2019 record; not used as a colored-stone grade here

REFRACTOMETER

RI range

1.621 - 1.640

Birefringence

0.019

Optical character / sign

Uniaxial negative (U-)

POLARISCOPE

Anisotropic reaction through 360 degrees

LWUV / SWUV

Inert / Inert

SPECTROSCOPE

No diagnostic absorption features observed

CHELSEA FILTER

No reaction

TREATMENT

No indications of treatment observed by standard examination

STATED ORIGIN

Afghanistan - client-declared; not independently determined

COMMENTARY

Natural tourmaline. Transparent. The original record stated the stone as untreated and included the legacy note <VS2>.

EXAMINATION

Paris, France | 21 April 2019

Reissued 17 September 2026 from the original examination record

Isaiah Triollet FGA | Gemmologist

Signature and stamp

CKYSTONES.COM

This report records a standard gemmological examination of the item described. It is not a valuation. The stated origin is client-supplied. The FGA badge reflects 2026 membership. This reissue standardizes the original wording and corrects the birefringence arithmetic; it is not a new physical examination.
